The game tutorial

Gamers who want to win or improve their game in a short period of time.

Domain

Digital Entertainment Experience and Engagment

DESIGN CONCEPT

This is a platform that provides a variety of game tutorials, where users can not only view the tutorials of various games, but also contact the game trainer that suits them, and can also act as a tutor to answer various game questions on the platform.

TARGET AUDIENCE

Gamers who want to win or improve their game in a short period of time.

Problems

In the process of playing the game, players will always encounter various problems, such as: in the development game, do not know how to collect some special props. To solve such problems, the usual choice is to query through google, which is very troublesome. In addition, for some games that are niche and difficult to learn, it is difficult to find the answers users want through the Internet.
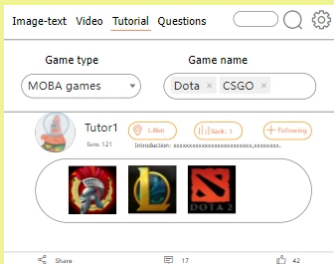

OPPORTUNITY

The platform not only allows users to view tutorials for a wide range of games, but also to find the right game tutor for them to quickly improve their game.
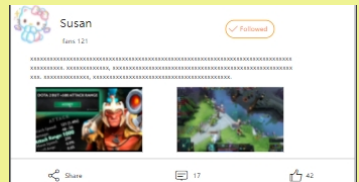

FUNCTIONS & PROTOTYPE

Tutorial page

The platform features mostly tutorial pages. A user can act as a learner or as a tutor. In the tutorial page, users can enter the game type and game name to find related tutorials, or use the search function in the upper right corner to find specific game tutorials. Tutorial is a personal trainer, where users can find their own personal trainer. At the same time, users can answer some questions as a tutor, help other players solve difficulties and get corresponding rewards.

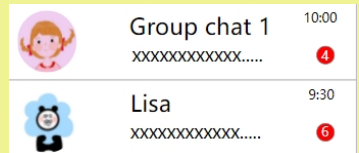

Main page

The content of the homepage is mainly to push some game tutorials that users may be interested in. Users can also publish their own game tutorials here to help other users.

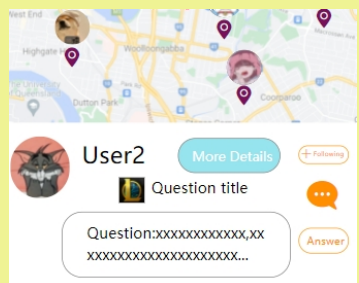

Chat page

In the chat page, users can see some information related to themselves, and can chat with other users or join group chats.

Me page

The me page is about some personal information of the user, including the games the user likes, and the amount of E-coin in the account.

Near page

In the near page, users can view the questions raised by nearby users, as well as view nearby tutors and their more details, so as to determine whether to select the user as their tutor.
